ACCESS GUIDE TO THE HEALTH RIGHTS OF IMMIGRANTS

1 – HEALTH RIGHTS OF FOREIGNERS IN POSSESSION OF THE PERMIT OF STAY

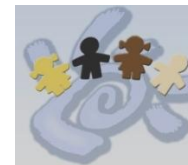

- As Italian citizens, immigrants are registered in the National Health Service (SSN – Servizio Sanitario Nazionale) and are assisted by family physician (or by the pediatrician if a child is under 14 years). The physician is chosen from a list of available doctors at the time of registration in the SSN and of the issuing of the health card.
The registration has the duration of the permit of stay and is extended to minors and relatives in charge who are regularly resident.
The **Family Doctor** is the main reference for all health problems. The doctor has to inform his patients about the working hours and during this time:
 - He examines the patient in his studio or, if necessary, at home
 - He prescribes treatments, drugs, special medical visit, diagnosis exams and hospitalization.
- To make a special or a diagnostic test, prescribed by the family physician, it is necessary to make a reservation at the Central Centre of Reservation (**Centro Unico di Prenotazione-CUP**). In order to access the specialized services, the concerned person - if not in the right to obtain specific exemptions – has to pay a ticket (participation to the expense - **ticket**).
- The person (Italian or foreigner) registered at the SSN, that is temporarily away from the municipality of residence, maintains the right and the modalities of access to the benefits guaranteed by the SSN, but has to pay the medical examination of the family physician he refers himself to.
- When the doctor is not in service it is possible, in case of health problems emergencies, to contact your SSN physicians (continuity care) of the district (Emergency Medical Service) phoning at the following hours:
 - Every day ⇒ 8.00 pm to 8.00 am of the next day
 - Saturday and Holidays ⇒ from 10.00 am to 8.00 pm
 - Holidays ⇒ from 8.00 am to 8.00 pm
 The Medical Service is free and does not require the payment of ordinary benefits(for example examinations, prescriptions of diagnostic tests)
- In the event of a **medical emergency**:
 - People in severe conditions or that are not ordinarily transportable could request the intervention of an ambulance by calling **118**, providing all the information required by the operator precisely (location, reason of the call, etc..). The service is free and is available 24 hours on 24.
 - You can go with the person who is sick to the nearest hospital emergency unit .
